Permanently remove files and data

<http://www.mireth.com/index.html>

ShredIt from *Mireth Technology*

When you delete a file from your computer, only the file reference is deleted. The data is still retrievable. This could be harmful when dealing with sensitive information like credit card numbers and personal information. ShredIt easily and permanently deletes files and folders from your computer. Drag a file to ShredIt and watch it disappear forever.

Requirements: OS 8 and above
Cost: Free demo; \$19.95 for full version
