Mireth Technology **Music Man v2.7**

Installing **Music Man 2.7** is as easy as downloading the .img file from the Mireth website < www.Mireth.com > and dragging the **Music Man** folder to your Applications Folder. You get a 15-day free trial to decide how good the program is before you pay for a registration. For what it does it is remarkably inexpensive, costing just $25.00 to license the download version (or $35.00 if you want to order the CD). For that you get a complete music management system that you can use to take control of all of your music files. Music Man uses a very clean task-based interface. Each of the seven available tasks is represented by a tab across the top of the Music Man window. Depending what task you want to do you click the corresponding tab. The tasks are:

Organize - organizes your music into Play Lists and Play Lists into Play List groups for burning

Play - Plays Audio CDs, music files from your Mac, from CD, from DVD or directly from flash media

Rip - Rips files from CDs

Convert - Converts music from one format to another format

Burn - Burns file to Audio CD, MP3 CD, MP3 DVD

Flash - Writes music to flash memory

Music Store - use if you want to buy music from Music Stores

Key Features:
· Ripping
As a MP3 ripper Music Man can rip Audio CD to MP3, WMA, AAC (M4A,M4B) or to Ogg Vorbis - it will rip the whole CD or just selected tracks, and can rip to both MP3 and M4A in one operation*

· **Converting digital formats**
It can convert the most popular digital music formats. Convert **from** Audio CD, unprotected AAC (m4a, m4b), MP3, WAV, unprotected WMA, Ogg Vorbis, AIFF, midi. Convert **to** Audio CD, AAC, MP3, WAV, Ogg Vorbis, WMA. (Please note: Music Man will not convert DRM protected files. This includes WMA, M4P, DRM protected purchased iTunes tracks, or any other DRM protected file formats.).

· **Playing music**
Play Audio CD, MP3, WMA, Wav, AAC (M4A,M4B,M4P), Ogg Vorbis, Midi on Mac OS X
Play from your Mac, from CD, From DVD, from Flash Drive
Play music files from anywhere on your computer
